CRYPTO CURRENCY

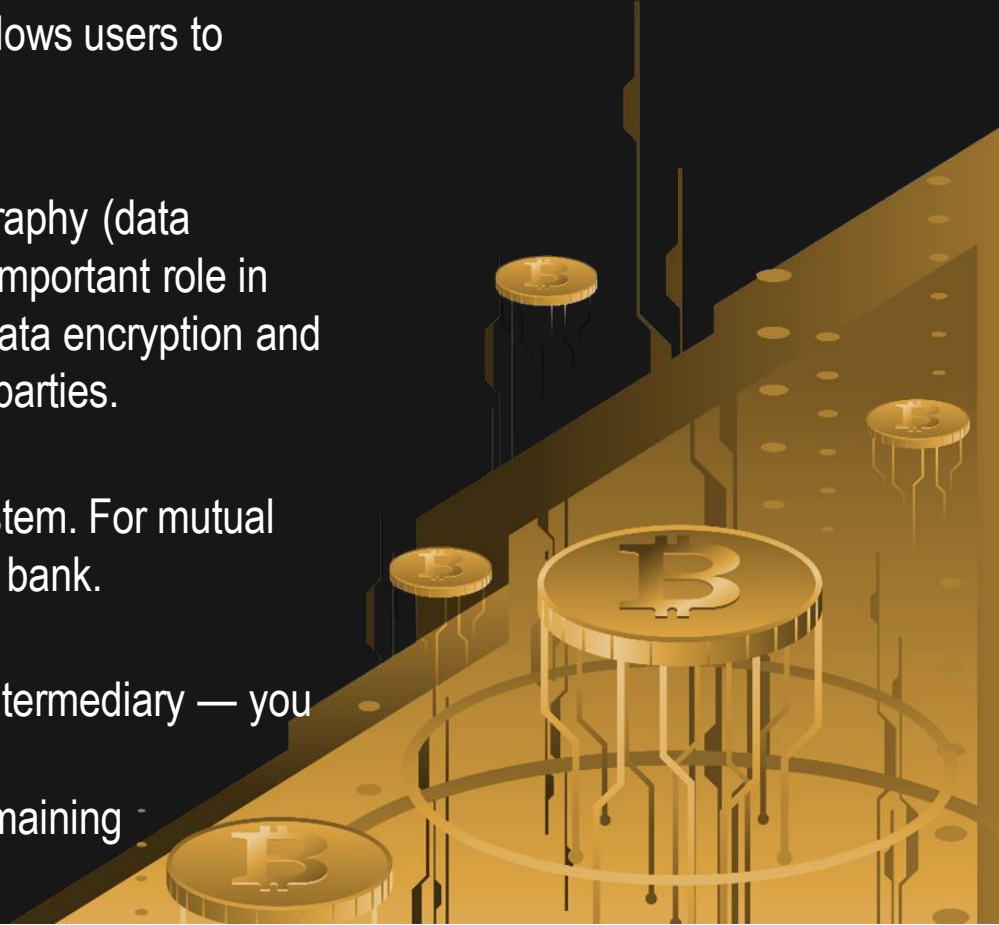

Cryptocurrency is a type of digital currency that allows users to make transfers in the digital space.

The term is formed by merging the words cryptography (data encryption) and currency. Cryptography plays an important role in the cryptocurrency space, as it provides reliable data encryption and protects transactions from interference from third parties.

So, the money we are used to is a centralized system. For mutual settlements we need an intermediary — usually a bank.

In the case of cryptocurrency, we don't need an intermediary — you can make payments directly (peer-to-peer, p2p).

Once again, the blockchain will survive, as the remaining devices will have a full record of all transactions.

HISTORY OF CURRENCY

Evolution Of Money

From the occasions we traded meat with eggs till the computerized age that we have bounty alternatives to pay for products we need. This is the money related history of the worlds economy

CRYPTO CURRENCY

If you want to be financially independent from any cataclysms, political decisions, the decisions of those in power, then start to master the world of cryptocurrency.

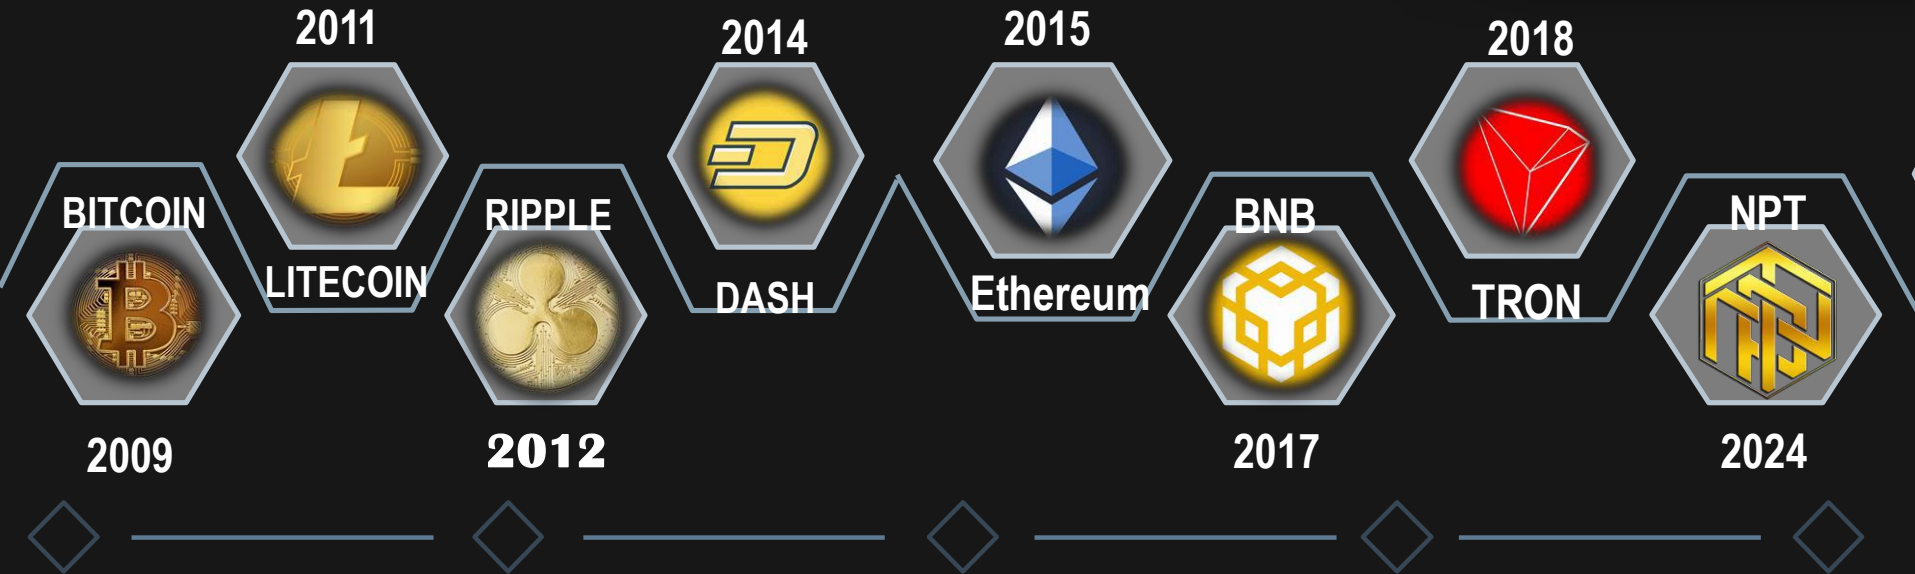

EVOLUTION OF E-MONEY

E-Money

In 1983, an examination paper by David Chaum presented the possibility of advanced cash. In 1989, he established Digicash, an electronic money organization, in Amsterdam to popularize the thoughts in his research. It sought financial protection in 1998. E-gold was the principal broadly utilized internet cash, presented in 1996, and developed to a few million clients before the US government shut it down in 2008. E-gold has been referred to as "advanced money" by both US authorities and academia. PayPal dispatched its USD-named administration in 1998. In 2009, Bitcoin was dispatched, which denoted the beginning of decentralized blockchain-based computerized monetary forms with no focal worker, and no substantial resources held available for later.

EVOLUTION OF CRYPTO CURRENCY

As of 26 of march 2018, about 1587 Coins and Tokens Tracker by Coinmarketcaptoken.com

DEFI: DECENTRALIZED FINANCE

Decentralized finance, or DeFi, loosely describes an alternative finance ecosystem where consumers transfer, trade, borrow and lend cryptocurrency, theoretically independently of traditional financial institutions and the regulatory structures that have been built around Wall Street and banking. The DeFi movement aims to “disintermediate” finance, using computer code to eliminate the need for trust and middlemen from transactions.

IMPORTANCE OF DEFI

DeFi takes the basic premise of Bitcoin-digital money—and expands on it, creating an entire digital alternative to Wall Street, but without all the associated costs (think office towers, trading floors, banker salaries). This has the potential to create more open, free, and fair financial markets that are accessible to anyone with an internet connection.

WHAT IS TETHER'S **USDT**? THE BIGGEST STABLECOIN ON CRYPTO MARKET!

As mentioned, Tether (USDT) is a stablecoin that launched in 2014 under the original name Realcoin. It was founded by the company Tether Limited to act as a digital, blockchain-based version of the U.S. dollar. In November 2014, Realcoin rebranded to the now widely recognized name, Tether, aiming to solve the biggest problem facing crypto currencies – volatility. By pegging its value to the dollar, Tether could provide stability amidst the turbulence of the crypto markets. So, each Tether token is designed to be worth exactly \$1 USD.

If the prices of cryptocurrencies are falling rapidly, you can buy USDT with other cryptos instead of trying to withdraw cash. USDT also provides the ability to easily transfer assets between exchanges. Some exchanges do not have fiat deposit and withdrawal options, but almost every cryptocurrency exchange allows USDT trading.

Cryptocurrencies are still volatile by nature. USDT was developed according to the desire of investors to hedge volatility and keep their assets ready for use without any problems. Investors have a way to trade or stay in cash while being protected from the volatility of cryptocurrencies. In this way, they have the convenience of trading for opportunities in the crypto market at any time.

ABOUT NITROX PRO TOKEN

NPT (NITROX PRO TOKEN) is stable platform in which you invested and make fast money.

We are a group of companies handling a variety of business streams since marking inception in 2020.

Many multibillionaire investors are already rubbing shoulder with us on the investment front. Many prominent fund managers associated with us specialize in dealing with trading in forex.

Coming to the point, NPT TOKEN is the venture of NITROX PRO TOKEN Group. This BNB Blockchain based cryptocurrency for safe, speedy, and decentralized transactions can change the way you transact.

Blockchain is the technology that enables the existence of crypto (among other things). Bitcoin is one of the bestknown crypto, the one for which blockchain technology was invented.

This is why NPT TOKEN could be the best cryptocurrency to invest in.

CEO MR. ALBERT JANSON

is an experienced leader as well as a fund manager & forex trader. They have many more projects in the amsterdam netherlands! Since 2015, he has been helping multiple companies scale new peaks of growth every day with his remarkable leadership and skills.

Let's know his journey in detail. He graduated in the domain of accounting with A grade before mastering finance and fund management in forex trading in 2015. He put his business-related education and skills to use in multiple industries before becoming the very best that he is today in the world of finance and fund management in forex trading.

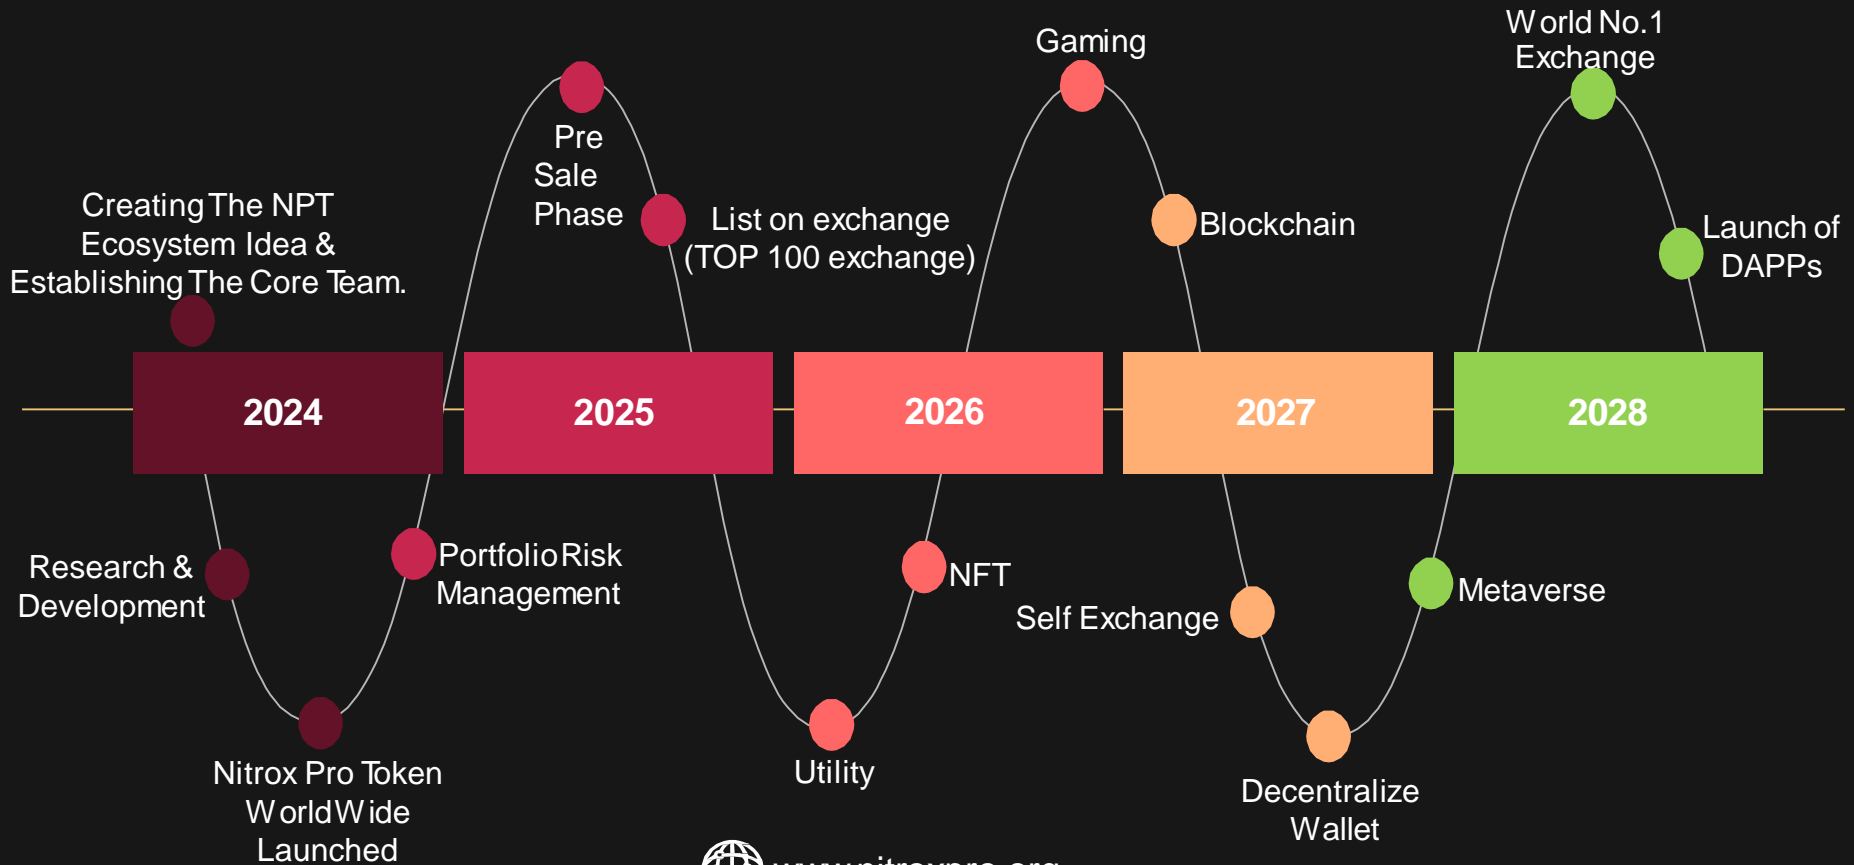

He has launched another business venture named NPT (NITROX PRO TOKEN) in 2023. NPT is the most ambitious business venture of Mr. Albert Janson. He plans on making NPT a worldwide multi-utility cryptocurrency in all walks of life.

RE-INVEST INCOME

MONTHLY REWARDS INCOME

NITROX PRO TOKEN MARKETING PLAN

MINIMUM DEPOSIT

\$25

USDT

BEP20 NETWORK

TRADE REVENUE PROFIT UP TO 200% EXPECTED RETURNS

1%

DAILY TILL 200 DAYS

With Big Investments, Comes Big Profits.....

STAKING PERIOD & REVENUE

DIFFERENT DURATIONS OF STAKING

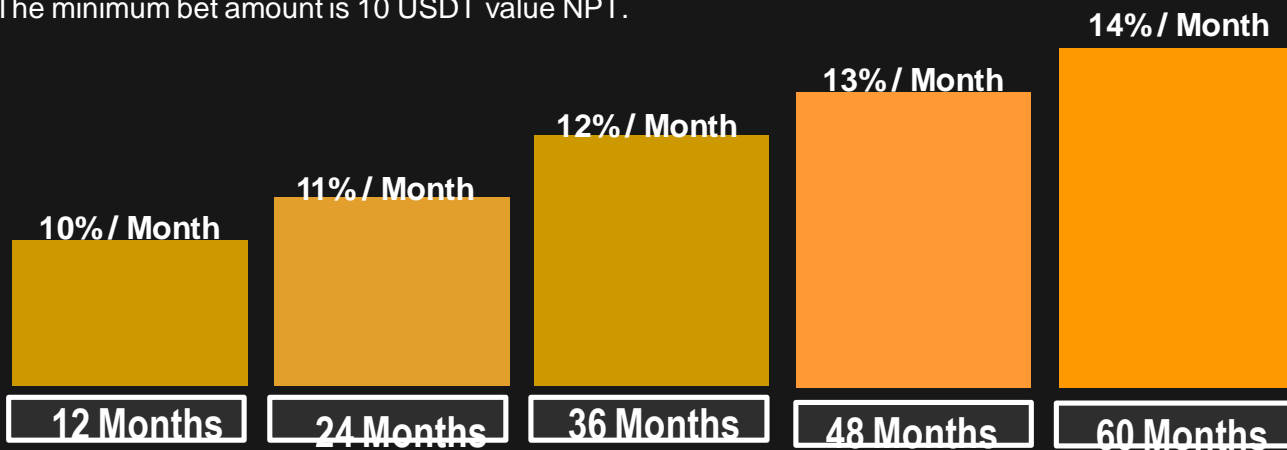

Staking NPT tokens provides significant benefits to users.

By staking NPT for a certain period, users can earn attractive rewards.

Over a 12-month staking period, users receive 10% per month, providing a stable return on their investment. Opting for the 24-month stake option offers a higher reward of 11% monthly.

And if you do it for 36 months, you will get 12% monthly, if you do it for 48 months, you will get 13% monthly. And the longest staking option of 60 months offers the highest return of 14% monthly, providing users with ample long-term growth and passive income opportunity.

The minimum bet amount is 10 USDT value NPT.

REFERRAL INCOME - 5% INSTANT

Get 5% on the amount invested by the direct.

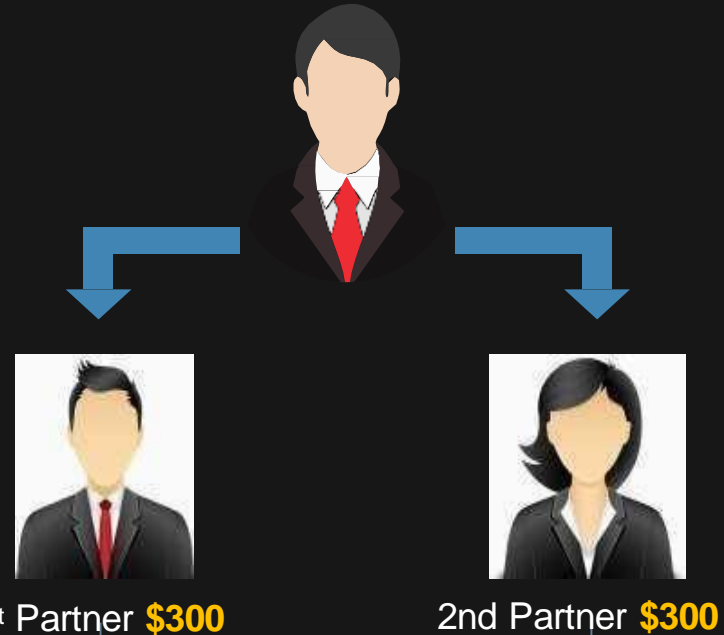

5%

EXAMPLE:

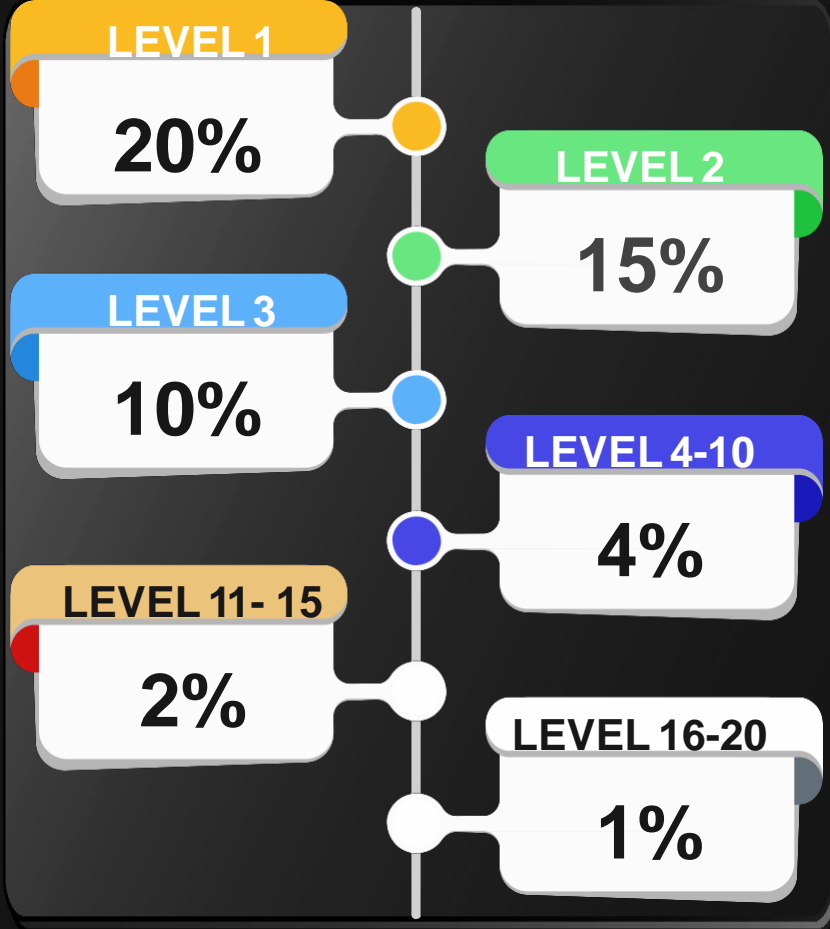

Total Amount Invested by Directs = **\$600**

Percentage on every direct = 5%

Total Referral Income = 5% of 600 = \$30

LEVEL INCOME

POINTS TO REMEMBER

2 level will open after investment of 1 direct.

You need to have 10 directs for taking benefits of 20 levels.

RE-INVEST INCOME

35 DAYS

1.2% DAILY

66 DAYS

1.5% DAILY

Note : (You Can Re-invest Your Staking Revenue For More Earning)
